# How to Use The EVO Smartport

1 Please visit http://www.wickedlasers.com/evo to download the app for your smartphone.

Remove the bottom metal panel to access the connection area for the Smartport.

2 Remove the jumper shown here before connecting the Smartport.
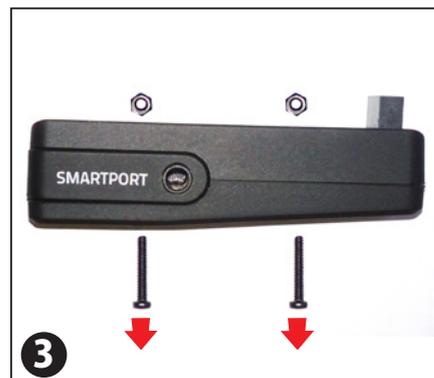

3 Remove the screws on the Smartport.

4 Connect the Smartport to the laser module section.

5 Use the two screws to secure the Smartport in place.

There are two options for connecting the Smartport with your device:
1) AV Cable
2) Bluetooth Accessory

6 **<Option 1>** Connect the AV cable to the Smartport.

Connect the other end of the AV cable to the headphone jack of your smartphone device then run the EVO laser app.
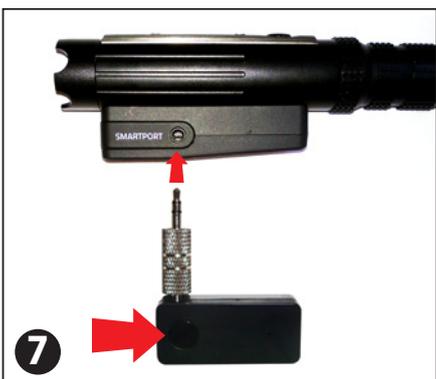

7 **<Option 2>** Connect the Bluetooth adapter to the Smartport and switch it on.

Pair the Bluetooth adapter with your smartphone device then run the EVO laser app.

8 Turn the laser on by pressing the the button on the tail cap.

9 The laser will start in Continuous Mode by default. You may select other operating modes from the menu bar.

The main operating modes are Continuous, Momentary, Strobe and Fade.
